Engineering Makes The Difference™

**SHEET RUN-OUT CONVEYOR
ROT Series**

Sheet Width (inches)	Max. Sheet Length (inches)			
	72	96	120	144
48	ROT46	ROT48	ROT410	ROT412
72	ROT66	ROT68	ROT610	ROT612
120	ROT106	ROT108	ROT1010	ROT1012
144	ROT126	ROT128	ROT1210	ROT1212

APPLICATION:

- The Sheet Run-Out Conveyor is designed to convey flat sheet away from a shear or cutting station
- Belt conveyor transfers sheet for manual stacking or delivery to automated stacking equipment

PROGRAMMABLE CONTROLS:

- Start pushbutton
- Emergency stop pushbutton
- Single turn line speed potentiometer (for manual operation)

CONVEYOR BELT:

- Integral belt guide system for positive tracking and take-up
- Fabric construction with soft, non-marking cover

DRIVE TRAIN:

- Conveyor drives are geared in at customer's desired max. speed

FRAME:

- Heavy wall tubing, steel plate and structural sections
- Two rigid and two swivel casters and hold-downs
- Screw type floor jacks
- Fully guarded drive train and electrical components

ELECTRICAL:

- Standard Electrical is 230 Volt/3 Phase/60 Hertz
 - Electrical other than the above is available as an option

OPTIONS:

- Custom belt coverings
- Adjustable reflective photoelectric unit and mounts for providing a signal to actuate a shear or other equipment
- Inspection table positioned under conveyor; max. extension is 24" less than conveyor belt length
